given a training program on 14 March 2023. The initial classes were taken by Mr. Ajan P J, Assistant Professor, Department of Electronics & Computer Maintenance. 30 students participated in the workshop.

The assembled LED bulbs will be supplied to our college staff and community.

Objectives

- To develop the skill of assembling and testing LED lights among the students.
- To enable the students to organize training classes on assembling and testing of LED light for the community
- To create awareness about energy conservation and supply LED light among the community.

Impact :

These activities helped students and public to create awareness about energy conservation.
