### Daily Attendance Legend:

The student was present then exited (the alternating background patterns indicate that the student may have left and rejoined the Meet)

The student missed the entire class

To help your eyes follow across the page, the table rows alternate between white and grey backgrounds which leads to two subtly different shades of green for the times when the student was present

**NB** - If you want a printed copy of this report, make sure that the 'More settings' -> 'Background graphics' checkbox is checked in the Print dialog.

### Up-Revis Prior Attendance Reports:

This allows you to update your old Attendance reports to the latest version of the HTML file. This will fix a number of issues and errors in the earlier versions of the reports.

- Click the 'Choose files' button below and then navigate to the location where your old attendance reports are located.
- By default, the attendance reports are saved to your 'Downloads' directory but you can (and probably should) move them to a more permanent location.
- The updated files will get saved once again to your 'Downloads' directory.
- Browser security dictates that the files can only be written to that directory... I cannot automatically save them elsewhere.
- NB** - you can update several files at once using the `ctrl` and/or `cmd` keys to select multiple files (but you will likely have to click 'Allow' in a system dialog before the updated reports are downloaded).
